HOT DEALS

WE'RE YOUR **LS** SWAP HEADQUARTERS

HOOKER EXHAUST HEADERS

SUPER COMPETITION BLOCK HUGGER HEADERS

Hooker Super Competition Block Hugger headers are a great choice for your custom car, truck, or rod. Ideal for applications where the frame rails are close to the engine. This long tube header is finished in durable silver block; Hooker's Super Comp Block Hugger headers feature a tight-tuck flowing through high quality steel tubing and tube design that's perfect for those exiting in a tightly formed collector all designed for tight-fit installations!

SUPER COMPETITION FULL-LENGTH HEADERS

This long tube header is finished in durable silver block; Hooker's Super Comp Full Length Headers feature a tight-tuck flowing through high quality steel tubing and tube design that's perfect for those exiting in a tightly formed collector all designed for maximum ground clearance and power generation.

FULL-LENGTH STAINLESS STEEL HEADERS

Hooker Blackheart headers are constructed of lightweight 18-gauge, 304 stainless steel with high-flow, long-transition collectors—featuring merge spears for maximum flow and increased exhaust velocity. They feature 3/8" thick laser-cut flanges that provide maximum surface for a leak-free seal and ultimate strength.

FROM **\$363⁴⁹**

FROM **\$965⁴⁹**

FROM **\$1265⁴⁹**

FLOWTECH EXHAUST HEADERS

BLOCK HUGGER HEADERS

Flowtech Headers are the perfect combination of quality and value. This block hugger header fits all popular hot rods with the popular Chevy LS motors. This header is coated with high heat resistant black paint for that classic look. Perfect for any rat rod.

PAINTED FULL-LENGTH HEADERS

Flowtech headers are the perfect combination of performance and value. Flowtech long tube headers are precision engineered using mandrel bent tubing, formed collectors and 5/16" flanges with sealing rings for a leak-free seal. All mounting hardware and gaskets are included for a simple installation. This header is coated in a high heat resistant black paint for a stealthy appearance.

SHORTY HEADERS

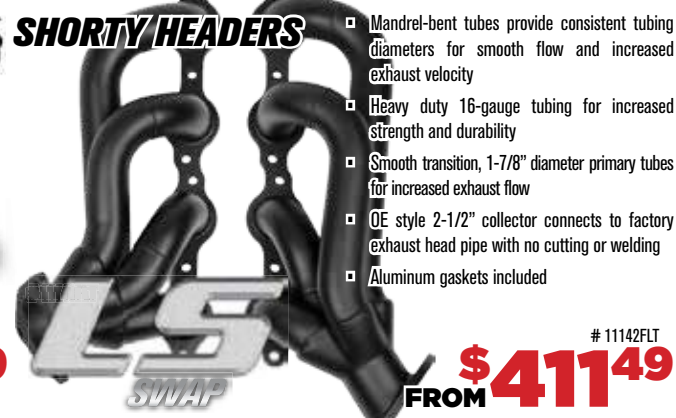

- Mandrel-bent tubes provide consistent tubing diameters for smooth flow and increased exhaust velocity
- Heavy duty 16-gauge tubing for increased strength and durability
- Smooth transition, 1-7/8" diameter primary tubes for increased exhaust flow
- OE style 2-1/2" collector connects to factory exhaust head pipe with no cutting or welding
- Aluminum gaskets included

Holley LS INTAKES

MID-RISE LS INTAKES

Got an LS engine to get running? Nothing is easier than bolting on a carburetor. Holley's dual plane carbureted intake for GM's LS engines will help you get on the streets quick! Its dual plane design makes it perfect for low end torque, yet it still pulls all the way to 6,500 RPM!

FROM **\$362⁴⁹**

SNIPER EFI FABRICATED HIGH RAM INTAKES

- SBC, SBF and LS applications
- 1/8" thick T6061 sheet aluminum construction is more durable than competitive intakes
- 90mm throttle body bore openings
- 100% TIG welded
- Available for EFI and carbid applications
- EFI Intakes include 3/8" Fuel rail kits

FROM **\$726⁹⁹**

Edelbrock LS INTAKES

PERFORMER RPM SERIES

If you want to build a carbureted LS, Edelbrock's Performer RPM LS3 intake manifolds have got you covered. Originally computer-controlled engines, you can top your LS with one of these Performer RPM manifolds and a carburetor to gain maximum power and a broad torque curve.

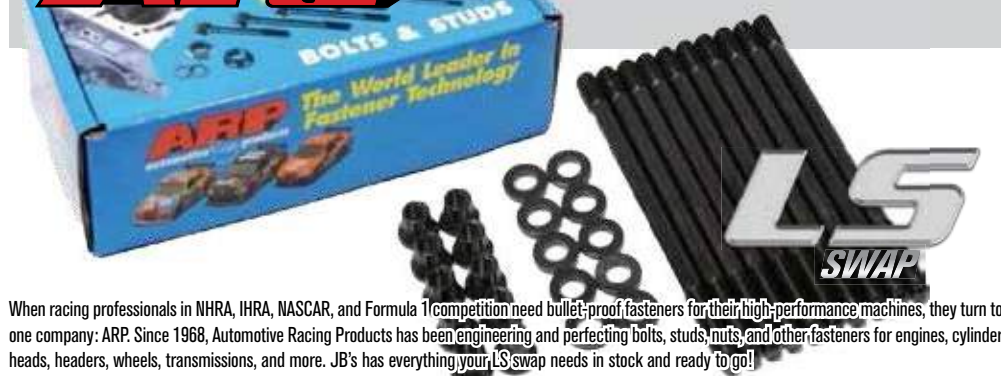

FROM **\$463⁶²**

PRO-FLO XT SERIES

The Pro-Flo XT LS1 EFI intake manifold is engineered with a large plenum and tapered runners to deliver maximum horsepower and broad torque band throughout the rpm range (1500-7000 rpm). Features include a 90mm throttle bore opening and 2.75" port exit height. This manifold produced 30 more horsepower over a stock LS6 manifold at 6500 RPM!

FROM **\$839⁶⁵**

ARP ENGINE FASTENERS

When racing professionals in NHRA, IHRA, NASCAR, and Formula 1 competition need bullet-proof fasteners for their high-performance machines, they turn to one company: ARP. Since 1968, Automotive Racing Products has been engineering and perfecting bolts, studs, nuts, and other fasteners for engines, cylinder heads, headers, wheels, transmissions, and more. JB's has everything your LS swap needs in stock and ready to go!

HOOKER LS SWAP ENGINE MOUNTS

Hooker LS engine swap mounts are designed to make the task of swapping an LS engine into your classic muscle car or truck as easy as possible. With five different mount kits available, you are sure to find the mounts needed to position the engine and transmission assembly in the appropriate location. Plates are available for use with stock small-block Chevy engine mounts to place the engine and transmission in the stock location or move it forward 1/2, 1-1/4, or 3-inches. Hooker also offers a mount kit designed for applications that use the clamshell type mount such as a G-body.

Holley FUEL TANKS

AEROMOTIVE

One of the most popular updates for older vehicles is swapping out the carburetor(s) for electronic fuel injection (EFI); but using an external pump to supply the high pressure needed for EFI can be a problem. External pumps are loud and can be difficult to mount properly. Holley Sniper EFI conversion fuel tanks are the complete bolt-in solution for your EFI conversion. They are a direct fit for a wide variety of specific applications, require no modifications and include a 255 lph submersible pump, a fuel level sender, internal baffles, and a filler neck. For the fuel you need with in-tank quietness, get Holley Sniper EFI Conversion fuel tanks.

Aeromotive's Phantom fuel systems mean you can make the switch to fuel injection without a fuel cell, custom tank, or a loud external pump and they definitely can handle serious power even at supercharged or turbocharged EFI pressures. Plus, Aeromotive has made it ridiculously easy for you to make the conversion—pretty cool, huh? You won't see the power, but you will definitely feel the power of Aeromotive Phantom 340 fuel systems!

Holley

SNIPER EFI POWER. PERFORMANCE. PRICE.

UP TO 1250HP

- Holley just brought EFI within range!
- Introducing Sniper EFI! It's economically priced so you can have all the benefits of EFI and still have money to finish or upgrade the rest of your ride! Perfect for street rods, muscle cars, off road trucks or nearly any carbureted vehicle. Put an end to cold start issues, hesitations, vapor lock and flooding. Upgrade to Sniper EFI and get the tactical accuracy of EFI today!
- Bolt on carburetor replacement (designed to fit single & dual carb manifolds)
- Throttle body mounted ECU - no extra boxes to mount
- Supports up to 650hp (4 injector version) and 1250hp (8 injector version)
- 4 wire vehicle connection (Battery +, Battery -, Switched Ignition & RPM)
- Integrated fuel pressure regulator, ignition timing control & coil driver
- Color touchscreen for setup and gauge views
- Calibration Wizard & self-tuning ECU - NO laptop required!
- Available in base & master kits (Master kits include complete fuel system: fuel pump, filters, feed/return hose and all fittings including fuel tank return line bulkhead fitting.)
- The included Wideband Oxygen Sensor provides realtime Fuel Map Learn!

Generating an incredible 37 GPM of coolant circulation, CSR billet aluminum electric water pumps give you the flow that you need, without costing you horsepower. CNC-machined from T-6 aluminum, these lightweight pumps have a direct-drive 12 V motor, spinning a redesigned impeller on a stainless steel shaft.

8554BK FROM **\$477⁹⁹**

Edelbrock's cast-aluminum water pumps are the ideal choice to prevent overheating in any street machine, street rod, truck, or any performance vehicle. Precision cast powdered metal impellers have extra large vanes for the maximum flow rate possible, ensuring adequate pressure and volume even at lower engine speeds.

8842 FROM **\$278⁵⁶**

Ideal for mild street vehicles and Sportsman drag cars, RPC Electric Water Pumps are lightweight cast aluminum and flow up to 35 gallons per minute.

R5926 FROM **\$234⁴⁹**

Weiland Action Plus pumps are ideal for street use. They feature a stamped steel impeller that provides optimum water flow, while consuming less horsepower than stock pumps. The impeller also limits high rpm cavitation (air in the water) and will not crack, corrode, or fatigue like aluminum impellers can.

9204P FROM **\$199⁴⁹**

Mr. Gasket mechanical water pumps are a great way to add some shine to your engine compartment. These brilliantly chrome plated water pumps are a great upgrade from stock and will keep your engine cool while looking cool.

AUTOMOTIVE AIR MOVER & DEHUMIDIFIER

The Flex-a-lite® 1000 is a must-have for racers, enabling you to cool your car quickly between rounds. It's also helpful in the garage to quickly clear smoke or fumes

FROM **\$279⁹⁹** # CFM1000

TCL AUTOMOTIVE

MAX-COOL REMOTE TRANS COOLERS

ATCI® Max-Cool™ Transmission Cooler is the most effective way to keep your transmission cool and extend its durability and performance. Available in four different sizes, the Max-Cool™ Transmission Coolers utilize a special "plate and fin" design to reduce transmission temperatures by up to 33 percent.

823800 FROM **\$135⁹⁹**

B&M

SUPERCOOLER REMOTE OIL COOLERS

B&M Super Coolers are 100% aluminum stacked plate style core which is ideal for additional transmission cooling. With oven brazed construction this sturdy cooler design is practically impervious to flying rocks or other debris.

70264 FROM **\$127⁹⁹**

Flex-A-Lite

REMOTE TRANSMISSION COOLER

Flex-a-lite® remote mount oil coolers provide transmission or engine oil cooling applications where there isn't enough space to mount a cooler on the radiator or when the engine is prone to overheating from high rpm and low vehicle speed like slow-speed off-roading.

300 CFM FAN
4190 FROM **\$258⁹⁹**

STREETFIGHTER

RATED FOR 400-775 HP ENGINES

FROM \$1417⁴⁹

SUPER STREETFIGHTER

RATED FOR 725-1025+ HP ENGINES

FROM \$1643⁹⁹

TURBO-350 STREET/STRIP

RATED FOR 600 HP ENGINES

FROM \$2266⁴⁹

Designed to withstand the rigors of street machines ranging anywhere from 400-775 horsepower with a non-supercharged system using pump gasoline, depending on application. With a TCL manual/automatic valve body, most units allow you to manually shift your car through each gear change or remain fully automatic.

TCL's Super StreetFighter transmissions feature many of the same benefits of the StreetFighter transmission packages with certain internal upgrades, including higher performance friction clutches and bands, as well as heavy-duty hard parts.

- Retains automatic upshifts and OEM shift pattern
- OEM input and output shafts
- Modified pistons for clutch clearance
- Modified high volume pump
- ALTO clutches & steels and heavy-duty intermediate sprag race

FLEXPLATES

Scat flexplates make excellent upgrades to your stock design. They feature extra-thick steel that's double-welded to the ring gear for added strength and anodized for corrosion resistance. Scat flexplates will withstand the extreme power and rpm of today's engines and are available in SFI-approved or standard applications.

FROM \$574⁹

FLEXPLATES

B&M flexplates are tough enough to handle severe applications and are ideal for 6,000+ rpm usage. They have precision-stamped centers and a rust-resistant, gold iridized finish. Some units are SFI-approved and are NHRA/IHRA-legal for all classes.

FROM \$121⁴⁹

PERFORMANCE FLEXPLATES

Whether you need stock, stamped, or heavy-duty, TCL forged flexplates are your performance solution. TCL offers popular Chrysler, Ford, and Chevy applications. Their forged selection for Chrysler includes special counterbalanced flexplates for neutral balance torque converters in cast crank applications that came with a counterbalanced torque converter. For Ford applications, TCL offers OEM-style small block plates built to precise standards with extra-thick welds to retain starter ring gear, and they are precision-balanced. Their Chevy stamped flexplates are built .035 in. thicker than stock from high-tensile strength materials with extra welding to help retain the starter ring gear, and to withstand the stress of high-rpm engines and high-stall converters. For stock or mild performance, buzzing around at high rpm requires the confidence of TCL forged flexplates.

FROM \$132⁹⁹

FROM \$199⁴⁹

FROM \$442⁹⁹

These TCL StreetFighter converters are completely remanufactured with furnace-brazed fins, needle bearings, and a flame-hardened hub. StreetFighter converters will give you about a 3,000 to 3,500 rpm stall speed. They're recommended for use on high-compression street/strip engines and higher performance cars and are used on some of the fastest street machines the world over. Plus, some applications are available with an anti-ballooning plate for use on vehicles equipped with nitrous oxide.

FROM \$580⁴⁹

When it comes to high-performance transmission components for racing vehicles and hot-rods, there are very few manufacturers that can give Transmission Specialties a run for their money. With over 30 years of production experience, this company is recognized as a leading manufacturer of high-performance automatic transmissions and other related parts in the United States. Transmission Specialties is the home of the world's quickest torque converter, which still remains the industry's icon of excellent engineering, unparalleled performance and durability.

FROM \$1182⁴⁹

Flywheel and flexplate bolts play an important role in the performance and safety of both street and race cars, which is why the fastener experts at ARP developed bolts far superior to OE hardware. The premium grade Pro Series has a 190,000 psi rating (originally developed for NASCAR Winston Cup competition), and the popular High-Performance Series has a 170,000 psi rating.

PULSE CAST EXHAUST MANIFOLD

STOP EXHAUST CRACKS IN THEIR TRACKS

Cast from high silicon ductile iron, the Pulse features expansion joints that allow the manifold to expand and contract without cracking or exhaust leaks. As the name implies, these manifolds are "pulse tuned" to assist combustion chamber evacuation and increased exhaust flow. The result: quicker turbo spool-up, reduced back pressure, increased power, better fuel economy.

\$669³⁰ #1045980

DODGE STEERING BOX STABILIZERS

EASY BOLT-ON INSTALL

BD's new Steering Box Stabilizer (SBS) eliminates steering wander and wobble caused by excessive shaft play in the steering box of late-model Dodge trucks. Designed for easy, bolt-in installation in about an hour, the SBS virtually eliminates frame flex at the steering box mounting point.
