

# SIGHT & SOUND

## INSTALLATION TECHNICIAN

Are you a people person with a passion for technology?

Put your talents to work in a fun and rewarding environment.

We are seeking highly productive installers that want to enjoy their career!

Successful job applicants will receive 8-12 weeks of on-the-job training, working with an experienced technician. Our training program will provide the successful applicant with the knowledge to complete all facets of the job in the most safe and efficient manner possible.

We have a competitive starting wage and benefit package. Each of our technicians is provided with a mobile communications device, and the necessary tools and PPE to complete their daily workload in a safe manner. Only when you, your trainer, and management are confident in your abilities will you begin completing installations on your own.

Absolutely no experience is required. We believe that technical skills can be attained through proper training and practice while character traits like personality and integrity cannot be learned.

### **About the Work:**

- You must have sufficient physical strength, stamina and coordination to perform skilled labour.
- Heights and confined spaces may be involved.
- Monday to Saturday work week with a minimum 40 hours.

### **About You:**

- You must possess a valid G class driver's license. All successful job applicants must provide a current driver's abstract.
- You must have a clean criminal record. All successful job applicants must provide a current CPIC.
- Must be adept at working in a team environment with little to no supervision.
- Mechanically inclined with the ability to use a variety of hand and power tools.
